# WORK FAST

Jeffrey Meyerson

This is it.

# Science Fair

It's almost our  
turn to present.

I'm so nervous I  
might pee my pants.

Getting here wasn't easy.

# \*Flashback\*

We had two weeks until the science fair.

First, we had to figure out what **didn't work**.

Potato clock?

Egg in bottle

Volcano

Great! Keep 'em coming.

Catapult!

Potato clock

Catapult

Medieval, I like it.

**Too** dangerous.

**WAY** too dangerous.

Sorry, Kitty.

MEOW!

**Super...**

børrrrringg.

Then, we had to figure out what we were **good at**.

We realized the best science is about **REACTIONS.**

Decent start, but how do we make it awesome?

I'll tweak the baking soda to vinegar ratio.

A smaller opening will increase blast height.

Meow?

All good ideas.

We trusted  
each other.

And gave plenty of  
**HIGH FIVES.**

We pushed each other to do our **best**.  
Even during **dessert breaks**.

Brain freeze!

Power through!

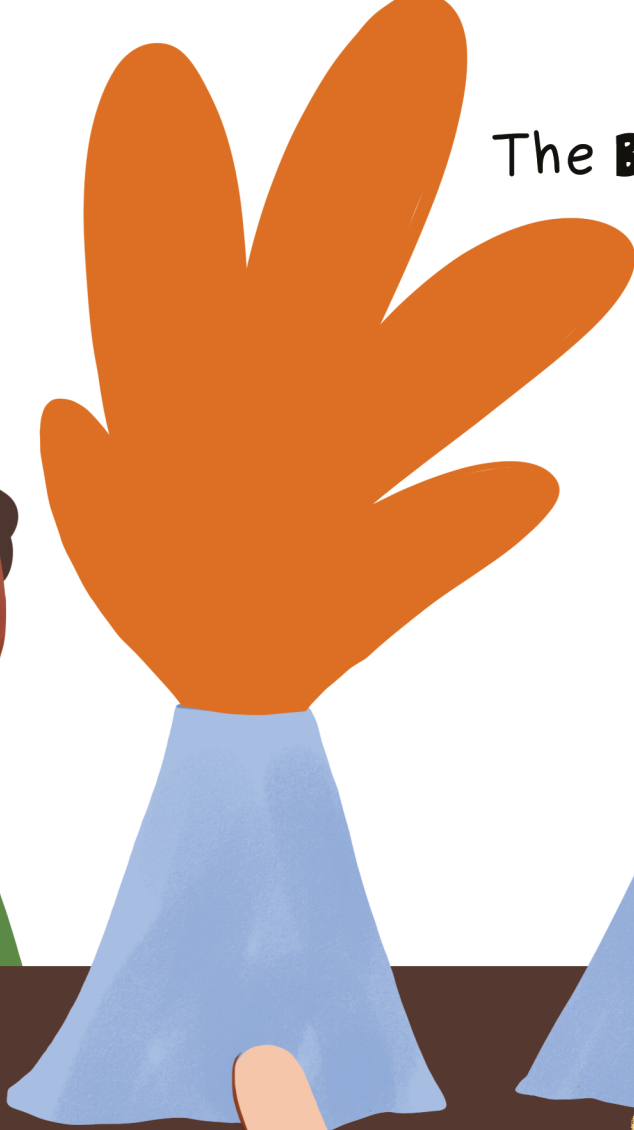

We wanted a **big reaction.**

The **BIGGER**

the **BETTER...**

Great job!

Lava wins  
arguments.

But  
something  
wasn't  
**RIGHT.**

It was a **reaction**,  
but maybe not the  
right one?

Then it hit me.

Eureka!

The thing about reactions is...

We need  
**pizazz!**

Yeah,  
**pizazz!**

Do volcanoes  
have **pizazz?**

Exactly, volcanoes  
**DON'T** have **pizazz!**

Huh?

Dance **party!**

Reactions are more awesome when you feel them.

You get it  
now?

Yes!

Time was running out.  
But we had learned **a lot**.

# Flashback-Back

So here we are.

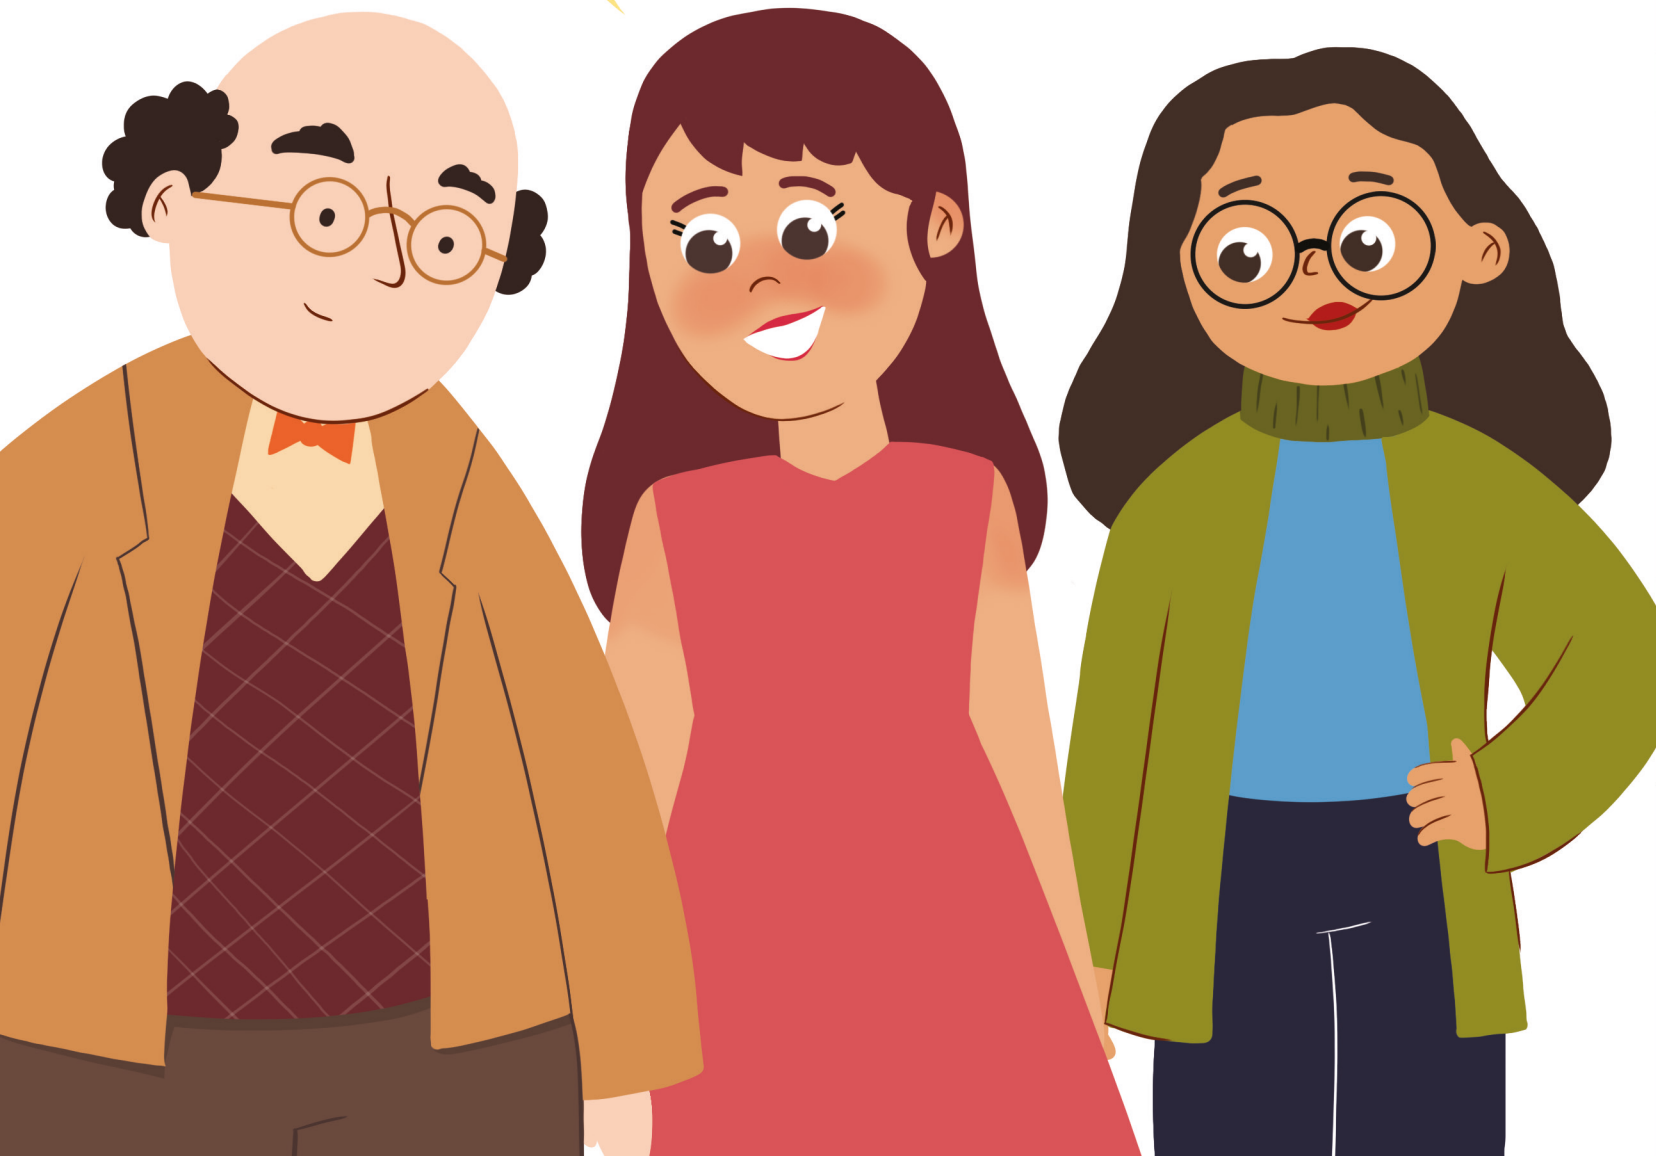

Rather than make the  
**volcano** react...

We'd like to make  
**YOU** react!

How do you plan  
to do that?

Drum roll please.

Pizazz

# ***Reaction!***

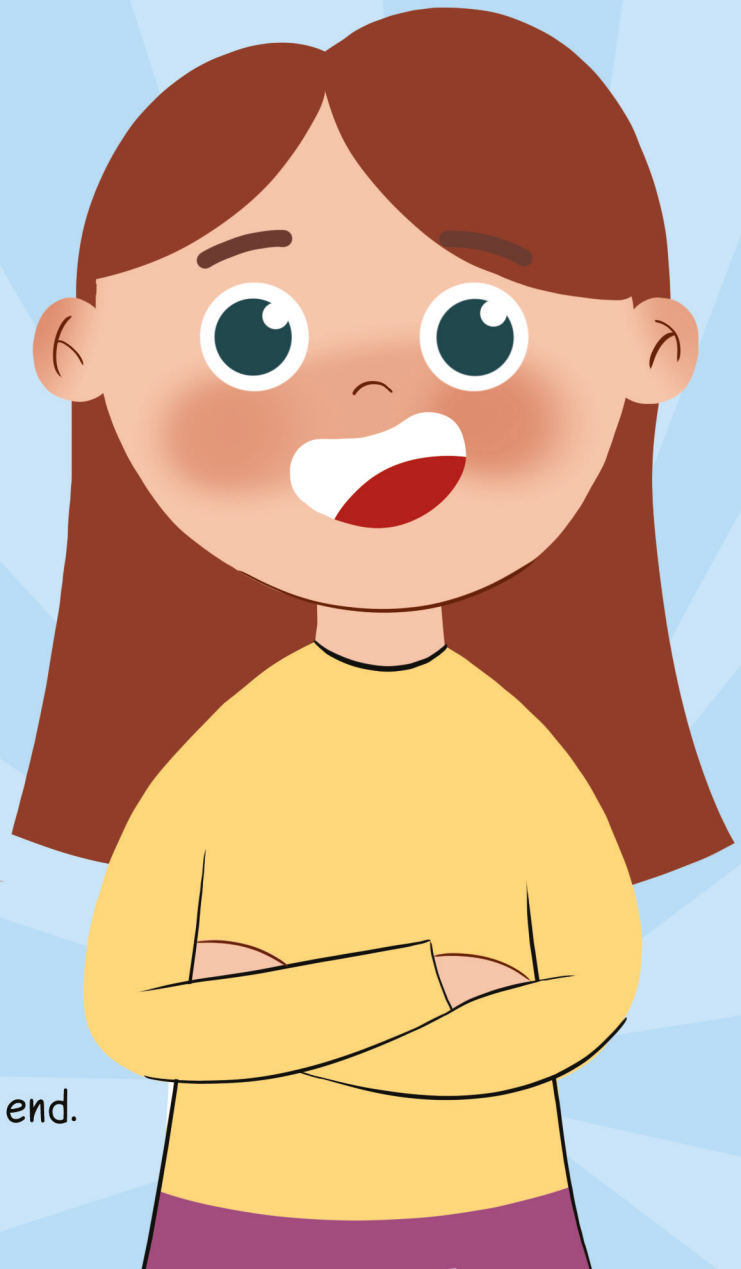

The results speak for themselves.  
Only leaving the question...

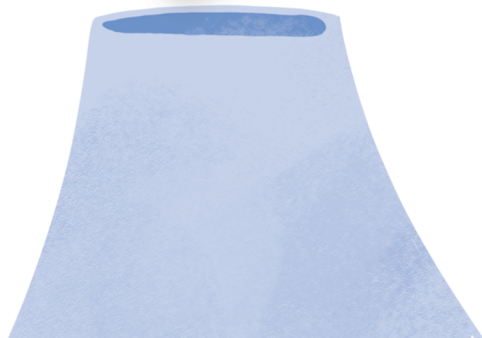

**SPOILER**

What should we  
do next?

The end.

DID YOU KNOW YOU CAN GET COLORING PAGES  
FROM THIS BOOK?

All you have to do is  
scan the code below!

SCAN ME

MEOW!
